Is your business ready for QuickBooks Online?

Different businesses have different needs. Is yours suitable for a cloud solution? Take this quiz to find out.

☐ Are you comfortable working online?

QuickBooks Online brings the power and efficiency of cloud-based computing to your everyday online world. You can even enjoy real-time access to your books from any mobile device or your computer.

☐ Do you want to access your books on a PC or Mac*?

With QuickBooks Online, you and your team can access the books on either device.

☐ Is yours a multi-location and/or multi-user business?

Up to five people can use QuickBooks Online, with users getting their own individual IDs, which can track (or limit) their activities. Multiple users can work on one file at the same time, resulting in significant cost savings compared with multiple software licenses.

☐ Would you like to easily share your books with your accountant**?

With QuickBooks Online, your accountant can access your books remotely to answer questions, fix problems, and do anything needed to get you ready for tax time.

☐ Does your business require progress invoicing?

If so, you may not be ready for the switch to QuickBooks Online Accountant. Based on your progress invoicing needs, we recommend QuickBooks Premier.

☐ Would you like to customize QuickBooks to meet your business's needs?

There are over 400 apps that integrate with QuickBooks Online, so you can customize QuickBooks for your business.

☐ Would your business life be better without software upgrades?

QuickBooks Online gives you zero maintenance software without the need for upgrades. You will always have the latest version of software and receive updates automatically.

☐ Do you need to track your balance sheet by class?

Choose QuickBooks Online Plus for the ability to categorize your income and expenses using class tracking.

☐ Do you track more than 350,000 transactions annually?

Based on this level of transaction needs, we recommend QuickBooks Pro.

☐ Do you require highly customized invoicing?

For businesses that need to use a custom invoice format—some franchises, for example, require pre-approved invoices or have legacy inventory customization needs—QuickBooks Online may not be the right fit.
